DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1, 5-11, and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al.

With respect to claims 1 and 10, Kim et al discloses a mounting device **fig. 5** comprising piezoelectric substrate **111**, a stem section **132**, and an upper extension **121** and a lower extension **123** forming an opening for a transformer.

With respect to claims 5 and 16, the reference discloses a C-shape opening in **fig. 8**.

With respect to claims 6, 7, 17, and 18, **fig. 8** discloses that the upper extension is flared and the lower is not.

With respect to claims 8 and 19, the reference discloses in **fig. 5** a single piece of metal.

With respect to claims 9 and 20, the reference inherently discloses a holding force.

With respect to claim 11, the reference discloses soldering in the last full paragraph of column 4.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 12, 13, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al in view of Yoshio et al.

Kim et al discloses a mounting device **fig. 5** comprising piezoelectric substrate **111**, a stem section **132**, and an upper extension **121** and a lower extension **123** forming an opening for a transformer. **Fig. 8** discloses that the upper extension is flared and the lower is not.

The reference does not disclose a pair of lower extensions.

Yoshio et al discloses the use of a pair of extensions for the purpose of increasing the resistance to deterioration.

It would have been obvious to one of ordinary skill in the art to use a pair of lower extensions for the purpose increasing the resistance to deterioration.

Allowable Subject Matter

3. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
